Brazil

Dear Camargo,

I'm organizing in a personal capacity a collection of screens realized by artists my friend.

I'd be very happy if you could realize for the collection a screen made specially by you.

They was already prepared from my carpenter, but if you have another idea to utilize another structure or another support this idea is welcome.

The screens I made realize are in three wood doors and the measure of every door is 50 cm. width and 175 cm.height.

If you agree to realize for me this screen let it me know and I'll send it you.

The idea about my collection is the following: to organize some number of screens, to make good photocolors and to publish them in colour on a good book with an essay by the semiologist Luis Prieto.

This book will be after the general catalogue of a great exhibition that will move on in all the europeans and americans museums.

As I have not so many possibilities to pay your work I propose you three possibilities:

- 1) to make an absolute political price
- 2) to give you an important work by me in exchange
- 3) to give you in exchange one of the numbered and signed edition of international artists realized by me of which I'll give you in a second time the list.

I hope you'll help me to organize this work on which I'm keep very much.

Waiting for your news,

best wishes,

SARENCO
