Dear Mr Camargo,

Thank you for your letter dated 29th August .

I sincerely hope you will come to the Tokyo Congress and count very much on your collaboration.

The Armando Verdiglione Foundation of International Culture aims at finding a specific intersection between industry, culture and art and above all at the promotion of the Second Renaissance as a reinvention of the arts and sciences.

The Congress represents an outstanding historical event since it marks the first real industrial; cultural and artistic exchange between Europe, America and Japan. It is the first verification of the Second Renaissance as invention and internationalism within the fields of economy, art and science.

Your contribution could be made in the form of a paper or performance.

I look forward to hearing from you soon. Best regards,

Yours sincerely,

Armando Verdiglione
